

# Magnetic Handwriting Paper

The magnetic write-and-wipe handwriting paper was designed to help save time with daily classroom activities. The pre-printed writing lines allow teachers to move quickly from one lesson to another without having to redraw the lines on the board. The design reflects students horizontal handwriting paper used in elementary classes. This allows students to practice the lesson as it is being taught on the board. It can be used in any classroom to teach students how to properly write letters, words, numbers and sentences.

The magnetic paper is made of a strong magnetic material and will affix to any magnetic board found in classrooms. It can also be used with any magnetic surface such as a metal chart stand or metal door. Classrooms that do not have a chalkboard or write-and-wipe board can use the magnetic notebook paper as a supplemental board. Clean the board surface before the magnetic paper is affixed to the board. This will help prevent dust build up behind the board. The paper should stay in place without slipping or moving on the board.

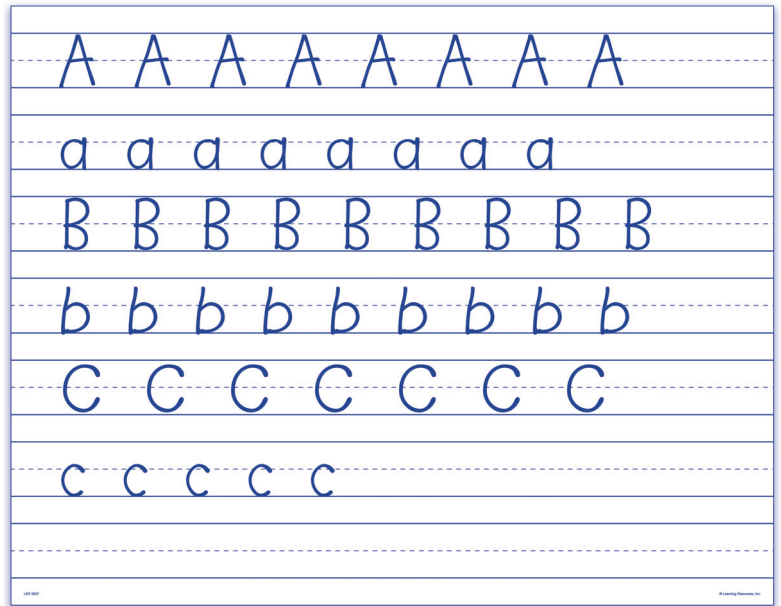

The handwriting paper is versatile and can be customized to meet any classroom teaching need.

The writing paper can be used to teach a variety of skills:

- demonstrate how to write the alphabet in D'Nealian, cursive, or manuscript
- show how to title a story or use the correct heading on an assignment page
- diagram sentences to learn the parts of speech

The magnetic handwriting paper can be used with a dry erase or wet erase marker. It is best to test your marker on a corner of the magnetic paper to make sure your marker works with the paper. When erasing the wet erase marker use a damp cloth and do not saturate the pages. Too much water will warp the paper.

When not in use, store the magnetic handwriting paper flat to prevent it from warping or tearing. If the chart is bent or folded, the paper will wrinkle and not return to the original state. If the edge of the paper curls, gently roll it in the opposite direction to flatten it out.
