This super set of dice domes and foam dice is a great addition to any classroom. Use the domes at centers or learning stations to practice math facts, work on number skills, develop place-value concepts, and much more. The removable bases allow teachers to customize dice combinations to meet the needs of various learners.

This set includes:

- 4 Dice Domes
- 8 Foam number cubes
- 4 Foam symbol cubes

Note: To remove the base from the dome, gently pull from the center opening.

Sample Activities:

- Put two dice and the symbol cube in each dome. Shake the dome and set it down. Look in the top of the dome and write down the math fact shown. Compute the answer. Repeat this activity for one minute and see how many facts can be computed.
- Put two dice in each dome. Shake the dome and set it down. Look in the top and write down the two possible numbers that can be made. For example, if a 3 and a 6 are shown, the numbers 36 and 63 can be made. Use three number dice to make this more challenging and write down the six possible numbers that can be made.
- Play a game with a partner or small group. All players put two number cubes and one symbol cube in the dice dome. Shake the dome, set it down, and look in the top to see the math fact. Compute the answer. The player with the highest number wins a point. Play ten rounds of this game and see who wins the most points. For a different challenge, give the player with the lowest computed answer one point.
